

PROFESSIONAL
ARCHITECTS,
CONSULTANTS &
ENGINEERS

Pick up the
PACE

As a consultant or network infrastructure professional, you're standing at the intersection of business and technology. The pace is nano-quick. The expectations from your clients, high; their tolerance for mistakes, low. While you're busy meeting client demands, you need a partner to turn to for the tools and resources that will make your job easier.

That's the compelling value behind PACE: ADC's exclusive program for Professional Architects, Consultants and Engineers. Membership in PACE is also one of the few times exclusivity doesn't come with a high price. Joining is absolutely free – and it opens you up to a world of benefits that will help you be more responsive to your clients. And at the end of the day, that's what really matters in your world.

For the Consultant, Architect, Designer, or Engineer, the pace of business has never been more brisk. That's why ADC created PACE, a free program developed to support the infrastructure design needs of this select group of professionals.

PROFESSIONAL ARCHITECTS, CONSULTANTS AND ENGINEERS

- Technology, product and application training
- Consultation on industry trends, standards and technical materials

Professional-Grade Products For Professionals Serving Their Clients

ADC is committed to the various markets we serve as a complete solutions provider. From helping you design energy efficient 'green' data centers, to providing products and guidance for unmatched wireless coverage, we have the products and services to help you be more efficient and effective each and every day. With PACE, our job is to help you be more successful in all your client interactions.

As a member of PACE, you are a key partner and have the ability to choose which industry leading information you want to receive when you register.

Structured Cabling Solutions

ADC's TrueNet® brand of structured cabling products provide a multitude of Cable, Connectivity and Cable Management solutions from the data center to the desktop. This breadth and depth of products is unmatched by any other firm. TrueNet is a complete end-to-end copper and fiber solution designed, tested and manufactured by ADC.

FTTX Solutions

ADC's OmniReach® FTTX Infrastructure Solutions are the industry's first platforms designed from the ground up to meet the unique requirements of FTTX networks. ADC offers a complete product portfolio that supports all network topologies including Fiber-to-the-Premises, Fiber-to-the-Curb and Fiber-to-the-Node to meet and serve the unique needs of diverse markets and customer segments.

Wireless Solutions

ADC's industry-leading portfolio of innovative In-Building and advanced Outdoor Solutions provides coverage and capacity in places where wireless reach is impeded, such as high density urban centers, rural/remote locations, underground, and campuses to name just a few. Never before has wireless access been more in demand, or has it been more important to include wireless coverage and capacity planning early in the design process. Partner with ADC to provide your clients with world-class Wireless solutions.

Broadcast and Entertainment Solutions

For more than 50 years, ADC has led the industry in audio, video and data patching products. By designing, engineering and manufacturing virtually all of its own components, ADC has established itself as a premier product provider in broadcast and entertainment. ADC's strict adherence to quality standards and careful manufacturing, assures dependable, long-lasting products.
